EXTRA RELEVANT QUALIFICATIONS

Technical Writer on Hashnode

I run a blog on Hashnode where I write about web development. My articles are mostly about React JS, Node JS and Express JS. I'm passionate about sharing my technical skills with others. My blog link is https://techlia.hashnode.dev

PART TIME FREELANCE DEVELOPER ON UPWORK

I have been working on Upwork since January 2022 as a freelance full stack developer where my roles include:

- *Developing full stack websites from the ground up.*

- *Debugging already made React applications.*

- *Integrating third party APIs to existing websites.*

The link to my Upwork profile is https://www.upwork.com/freelancers/~0159a1b40e1aae49c5

I'm a Full Stack Web Developer mostly working with the MERN stack.

I'm able to code production ready full stack web applications from the ground up using React JS, Express JS, Node JS and MongoDB. Along with a good understanding of the GIT version control.

I have fundamental knowledge in developing REST APIs using Express JS. Along with a good understanding of the HTTP protocol and the AXIOS library.

Extensive knowledge in responsive design techniques along with a good understanding of the TAILWIND CSS framework.

PROJECTS I HAVE WORKED ON INDEPENDENTLY

EXPRESS JS AND JWT AUTHENTICATION API WITH A REACT FRONTEND

- A modern Authentication API using JWT, Express JS and MongoDB.

-The API is secured against cross site forgery attacks and only a limited domains can access it.
-Private routes and role based authorization using JWT and React router on the frontend.

-React query is used to make network requests to the API.

The live project is at https://how-to-frontend.vercel.app

Two player chess game built with React js

-Built using React JS and ES6 classes
- ES6 classes have been used for Chess pieces.

- The Project is deployed on Vercel.

The live project is at https://amschel-chess.vercel.app

FULL STACK TASK MANAGER APPLICATION

- A crud application where a user can create a task, delete a task and label a task as completed.
-The data is stored in the mongo database.
- The project is deployed on heroku.

The live project is at https://amschel-tasks.herokuapp.com
